

Pramata Overview

Pramata's **Enterprise Grade Contract AI Platform** gives you the power to use AI-driven contract management to solve business-critical challenges—like stopping revenue loss, reducing vendor costs, accelerating the contract lifecycle and ensuring compliance.

Say goodbye to overly complex “AI-powered CLMs” that don't live up to their claims. Explore how the Pramata next-gen Platform gives you the power to solve business critical challenges with contract AI that actually works. Helping you harness the power of clean, organized contracts to accelerate your contract lifecycle and connect the business to the contract insights they need.

As your contract AI partner, Pramata is laser focused on helping you drive strategic, measurable value for your business. Pramata is set apart from other CLM offerings because of three distinct differences:

We solve high ROI problems - at scale.

The most intuitive contract management platform for business users, so you can solve business challenges, not just legal challenges.

We are THE contract data experts.

The most accurate, enterprise-grade contract AI + 20 years of F500 expertise solving the most challenging use cases, so you can get answers you trust.

We give you flexible deployment options.

No need to rip out your current CLM! Pramata can sit on top of your current CLM for an immediate upgrade to Enterprise Grade Contract AI. Or leverage our end-to-end solution for full contract management.

The Pramata Enterprise Grade Contract AI Platform gives you the power to:

Clean up your contract mess

If you want Contract AI that *actually* works, you have to start with Pramata's Contract AI Knowledge Engine. This powerful technology drives everything Pramata does, doing the heavy lifting to give you cleansed contract files, organized contract families and tagged contract clauses. From there, you can use the contract data once locked inside thousands of documents to drive real business impact.

Reach contract nirvana

Pramata's Contract AI Knowledge Engine is your organization's secret weapon. Giving you a best-in-class AI-Driven Contract Repository with unparalleled contract data and visibility. Making sure you always have cleansed and organized contracts, key insights, accurate renewal dates and more—instantly within reach.

Simplify the complicated

It's time to simplify the complicated. No IT required! Meet your easy-to-use contract lifecycle management solution that accelerates your contracting process and automates drafting, redlining, and approvals. Effortlessly view contracting metrics and run reports across the entire contract lifecycle.

Unleash your strategic impact

Pramata's AI Design Studio gives your business truly transformative generative AI capabilities, automating critical contract tasks and allowing you to customize the platform to your business' specific needs without being an AI expert. Leverage valuable contract insights, create AI-ready playbooks and automate redlining—the possibilities are endless, and the results come in minutes.
